CAREER OBJECTIVE

A data science enthusiast with extensive machine learning knowledge and strong communication abilities. Motivated, goal-oriented, and quick learner with a pleasant demeanor. I am a graduate with considerable data science skills who is innovative and scientifically rigorous. With a team-oriented mindset, I am ready to contribute my Analytical and ML modeling skills and implement them with real data for my company's growth.

EXPERIENCE

HOME CREDIT INDIA   **Bangalore,India**
Specialist Telesales (June 2019-Jun 2020)

   work entailed communicating with both new clients as well as existing clients about the different services and loans provided by the firm and sales pitching them to purchase our services.Along with convincing the clients following up from beginning till end and also making sure that any issues faced are resolved.
Achieved the target given by the firm while making sure that all rules laid down by the firm and the government is followed.

HGS   **Bangalore,India**
Executive (August 2018-Dec 2018)
   Work entailed calling existing customers resolving any issues faced by them while following company policies. I was also responsible for sales pitching the clients giving them the benefits of purchasing our products and making sure that they become our long and regular customers.

RECENT WORKS/PROJECTS

   I have worked on various projects ranging from Regression,classification,clustering,NLP and computer vision.Please follow the below link to know further.
